FutureSource Mobile
iPad Application for Traders, Brokers and Analysts

FutureSource® Mobile offers a new channel for accessing up-to-the-minute information on today’s markets, your watch list, charting, news and analytical tools, and more—all on your iPad. This solution is designed to complement your FutureSource desktop application, whether the new browser-based or terminal version. Using one account, you can access any of our platforms without paying duplicate exchange fees.

KEY FEATURES

- **Home Page** – Customize your home page to view watch lists, detailed quotes, news and charts.
- **Watch List** – View both customized and shared watch lists from your FutureSource application for true mobility.
- **Detailed Quotes** – Get detailed quotes, including a chart for the markets that you are watching.
- **Charting & Analysis** – Chart and analyze the markets that are of interest to you.
- **Real-Time Streaming & Trending News** – Customize your news pane for breaking news on the global markets.

ROBUST ENTITLEMENT CONTROL

- The same FutureSource account is used to log in to desktop and mobile, helping to ensure that a user is only logged in to FutureSource on one device at any given time. This mitigates the risk of being liable for dual exchange data usage (and associated fees).
- The same window and data entitlements are used between desktop and mobile, so users will only see on mobile what they are entitled to in desktop.

OPTIMIZED MOBILE DATA USAGE

- WiFi and 3G/4G network compatibility
- Users have control over data usage, allowing them to manage their cellular data costs

RICH USER INTERFACE AND GESTURES FOR THE iPad

- Portrait/landscape views
- Standard iOS gesture usage makes the app easy to learn and use
- Rich interactive controls and experience
