MARKET CHALLENGE
Global financial markets are increasingly interconnected, which requires sophisticated tools and information to help make informed trading decisions. Additionally, the relative value of asset classes is constantly in flux, driven by economic, geopolitical and natural events. In order to assess the historical relationships of assets, within the context of changing perceptions of relative value, market participants require robust tools and a broad array of content.

OUR SOLUTION
FutureSource® is a preferred global market data and analytics platform for market professionals who need to make more informed buying and selling decisions. It incorporates cutting-edge functionality and tools designed to support traders, brokers and analysts with risk management. FutureSource offers global asset class coverage, including stocks, bonds, foreign exchange, energy and commodities. And it is supported by Interactive Data’s state-of-the-art network, which can provide global exchange connectivity and a broad array of content to our clients.

FUTURESOURCE OVERVIEW
A professional decision-support desktop solution, FutureSource delivers real-time, historical and third party market data for energy, commodities, futures, options, foreign exchange, fixed income and equities, as well as derivatives based on the underlying asset classes. It is designed to allow you to access and arrange your information easily and quickly, and enable you to act on opportunities quickly and efficiently.

LEARN MORE
