Interactive Data’s MuniView™ service offers comprehensive municipal reference data, maintained and updated by our staff of research specialists, on more than four million active and historical municipal bonds.

MuniView flags critical and time-sensitive events, and provides information used for a variety of functions including:

- Reconciling your portfolio
- Maintaining your security master file
- Updating your CUSIP® file
- Reviewing disclosure data
- Creating customized reports
- Obtaining fundamental data

### Security Master Maintenance

Clients who maintain their municipal file on the Interactive Data system receive updated files reflecting changes and additions. You can choose from our standard report formats or a customized report can be designed according to your specifications.

### Delivery Options

- **Intra-Day**—MuniView can provide updates for changes and additions to the data at specified times throughout the day via intra-day delivery.
- **On Demand**—MuniView can provide access to the data as needed via on demand delivery.

### Periodic Updates

You can forward a list of securities to our Client Service department and request a full replacement file. Interactive Data will update the file and return it to you electronically.

### Disclosure Data

MuniView can help clients to comply with SEC Rule 15c2-12. MuniView supplies not only the type and description of material events, but also flags the events as official or unofficial. At a glance, MuniView alerts you to time-sensitive and critical events.

### MuniView API

Clients can access the MuniView API, which allows you to build customized systems for querying the database for reference data. This also allows users to design the way this information is displayed.
Data Items

Note: A number in parentheses indicates that multiple data items can be returned.

Fundamental Information
- Bank Qualified
- Bond Form
- Bond Insurance
- Call Date
- Capital Type
- Conversion Date
- Coupon Rate
