Interactive Data™
Interactive Data’s trading solutions for the global energy and commodities industry

The workflow dynamics and risk management needs of companies in the energy and commodities markets continue to evolve and grow. Market participants are experiencing record commodities prices (high and low) and volatility, historical oil spreads, unprecedented regulation of the global derivatives market, the implementation of Dodd-Frank, continued geo-political unrest and the persistent threat of natural disasters.

In combination, these factors are creating new levels of complexity for traders, analysts and brokers, as well as producers and manufacturers, who now, more than ever, need to feel confident about their trading and pricing decisions. That’s why market professionals turn to FutureSource®, the market data solution that provides real-time pricing data and news, as well as rich analytics and a robust suite of Excel tools that can be accessed anytime, anywhere. FutureSource helps clients maximize their market data spend without compromising on content, functionality or usability.

We are committed to delivering solutions that meet our clients’ needs for better management of market data, analysis and trade integration while decreasing their costs.

- Feature and content rich market data terminals
- Mobile solutions for smartphones and tablets
