

Interactive Data's Corporate Actions Service

Enhanced global corporate actions service provides data in a consistent format, with timely, flexible delivery – designed to help firms manage risk exposure across the enterprise.

Timely delivery of corporate actions data is essential to help financial firms support trading operations and to keep clients informed of pending events that may affect their decisions. Failure to properly handle even a single complex corporate action can result in significant reputational damage and exposure to financial risk.

Interactive Data's Corporate Actions Service provides comprehensive and timely global content with exceptional depth of data. A choice of interfaces delivers the content via an innovative, consistent data model. The reengineered, innovative platform is designed to streamline client integration, enabling clients to easily import, track, and process corporate actions.

■ Benefits

- Integrated content—delivered in a consistent format across all instruments and corporate actions announcements
- Timeliness—intra-day delivery available every hour of the business day
- Ease of navigation—allows the user to select attributes of corporate actions data for specific business functions
- Flexible delivery—the same XML schema is used across a choice of flexible delivery options: scheduled batch delivery, message-based, and request/retrieve Web service API
- Features to show the audit trail—key for operational risk management

■ High Performance Interfaces

Interactive Data offers a choice of access to its feature-rich Corporate Actions Service using state-of-the-art technology. Whether you are processing end-of-day client notifications or intra-day fund accounting, Interactive Data can provide you the information when and how you need it.

- Scheduled file-based delivery—user-controlled definition of content delivery in daily or intra-day XML files (including delivery service for specific securities or universal coverage)
- Request/retrieve access—on-demand API-based access that allows applications to request specific content sets
- Message-based publishing—event-based notification of new events with associated updates

With its new message-based publishing option, Interactive Data can now provide corporate actions messages throughout the trading day.

This new dynamic method of data capture can help firms reduce the communication gap with corporate actions data.

Through the on-demand request/retrieve service option, clients can now request information they need to populate the various product templates and applications that support their operational and trading staff.

■ Service Options

Interactive Data understands the challenges of maintaining data across an organization. Many clients employ data warehousing and downstream applications to manage the data capture and update process. Interactive Data is a valued provider of data for a large number of global third party vendors, including corporate actions processing systems, trust and accounting providers and enterprise data management (EDM) suppliers.

The Corporate Actions Service allows clients to choose the types of data and security coverage they wish to receive. Clients can select subsets based on various criteria including:

- Geography—select all global markets or Americas, Europe or Asia Pacific markets
- Event coverage—select to receive events for a chosen geographic region or filter by event category
- Delivery time and format—select end-of-day per region or intra-day updates. Choose from XML files or delimited formats
- Portfolio tracking—content can also be filtered on a security-specific or portfolio basis

■ Comprehensive Coverage

Interactive Data's Corporate Actions Service combines corporate actions, dividends, and capital events information from across Interactive Data's service offerings. Coverage includes:

- Approximately 65,000 companies operating in over 90 countries
- Intra-day notification of corporate actions announcements and subsequent updates
- Cross-referencing support across industry identification standards including (but not limited to) CUSIP®, ISIN, and SEDOL®.
