Keeping in touch with financial markets on the move: PrimeTerminal Mobile solution for BlackBerry®

The PrimeTerminal Mobile application for BlackBerry® provides professional financial advisors with mobile access to the financial markets and personal portfolios. It is designed to enable users of

PrimeTerminal Professional to follow developments in the financial markets in real-time and monitor their own portfolios when they are on the move.

The Mobile application replicates users' personal portfolio settings from their desktop solution, while a sophisticated, user-friendly interface allows for individual customization of the data displayed.

■ Broad data access on the move

PrimeTerminal Mobile offers real-time access to a broad range of quotes, historical and reference data, charts, business news and market overviews.

Portfolios and watch lists can be easily accessed to check the performance of individual positions or an entire portfolio. Relevant news on a specific security can be quickly retrieved.
