

# Mobile and Tablet Applications

## Solutions for Portable Devices

Interactive Data offers a broad range of mobile applications and developer solutions to help access financial information on-the-go

In the increasingly sophisticated world of multi-channel financial strategies, mobile applications can play a vital role. A wide range of users (including private investors and wealth managers) often need instant access to real-time streaming data, news, and market summaries so that they can react quickly to market changes. Mobile products from Interactive Data are currently available via a range of devices including the iPhone, iPad, BlackBerry®, Android™ and other mobile and tablet devices.

Interactive Data's market data platform is the central information hub distributing data to various devices in customised applications. It ensures that the mobile solutions are always consistent with the corresponding web portal, which means that content changes are carried out simultaneously in either channel.

### Mobile Offering

Customize your mobile home site or application to display stock quotes and charts, with company news just one click away. Other popular datasets available on your handheld device may include funds data, derivatives information, interest rates, bonds data, currencies, and macroeconomic data provided by about 200 suppliers from around the world.

### Key Benefits

- Follow market activities on-the-go
- Monitor your own portfolio, create individual watch lists and set automatic alerts
- Choose from Interactive Data's comprehensive suite of mobile applications that can be displayed on your mobile device
- Customize screens to match your company's corporate design
- Integrate seamlessly into your system landscape via hosted pages/components or APIs
- Choose the level of data coverage and user permissioning that suit your specific needs
- Access via web-enabled mobile devices, which currently include iPhone, iPad, BlackBerry, Android and other hand-held devices

## Tablet Offering

Interactive Data's tablet applications are designed to deliver financial information to your touch-screen device. Users can follow the markets with detailed overviews covering global exchanges, rates, news, and more. They can also make use of intuitive screeners and comparison charts. Drill down to company-level detail such as quote, chart, news, profile, financials, and competitor information. In addition, track your investments via a watchlist and advanced portfolio tools.

Interactive Data's tablet applications are designed to enable the user to locate and identify key information by utilizing robust contextual navigation and by taking advantage of the opportunities offered by the tablet format with regard to rich visualization and interactive details.
